Optimizing Concurrency and Locking Behavior

Gerald Britton

IT SOLUTIONS DESIGNER, SQL SERVER SPECIALIST

@GeraldBritton www.linkedin.com/in/geraldbritton

Overview

Lock compatibility

Deadlocking

Deadlock graphs

Error handling in T-SQL

Tweaking troublesome queries

Lock Compatibility

Controls whether multiple transactions can acquire locks on the same resource at the same time

If a resource is already locked by another transaction, a new lock can be granted only if the mode of the requested lock is compatible
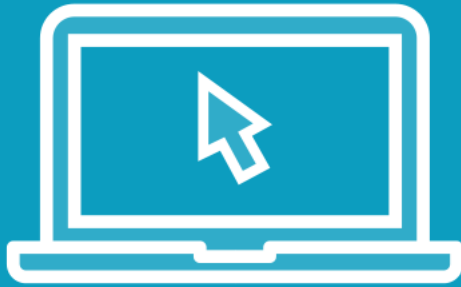

If the mode of the requested lock is not compatible with the existing lock, the transaction requesting the new lock waits for it

No lock modes are compatible with exclusive locks

Demo

Lock compatibility

Compatibility of Common Lock Modes

Granted Mode	Requested Mode					
	IS	S	U	IX	SIX	X
IS	Yes	Yes	Yes	Yes	Yes	No
S	Yes	Yes	Yes	Yes	Yes	No
U	Yes	Yes	No	No	No	No
IX	Yes	No	No	Yes	No	No
SIX	Yes	No	No	No	No	No
X	No	No	No	No	No	No

Compatibility of Common Lock Modes

Demo

Lock incompatibility and deadlocks

How did SQL Server know that a deadlock was happening?

How did Trillian get chosen as the deadlock victim?
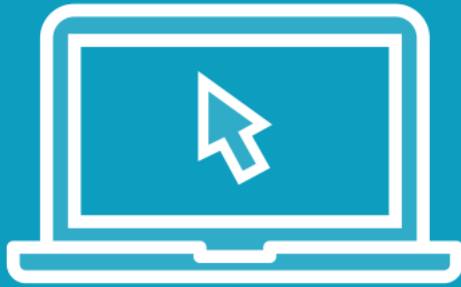

How can I find out more about a deadlock?

Deadlock Analysis Tools

**Extended Events**

SQL Server Management Studio

Demo

Looking at deadlocks

Demo

Custom Deadlock Extended Session
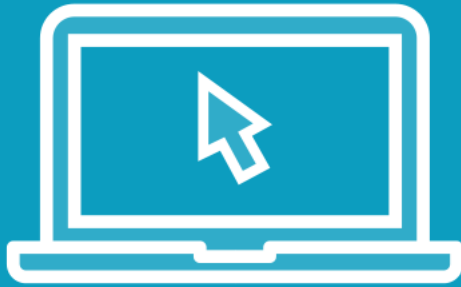

Application Considerations

Handle Deadlocks

- **Fail the process?**

- **Retry the transaction?**

Avoid Deadlocks

- **Keep transactions short**

- **DEADLOCK_PRIORITY**

Demo

DEADLOCK_PRIORITY

Batched updates

Retry logic

Summary

Lock compatibility

Deadlock detection

Extended events and XML reports

Application considerations

Avoiding deadlocks

    SET DEADLOCK_PRIORITY

    Batched updates
